"The first use of the policy was to block the account of German neo-Nazi group Besseres Hannover on October 18, 2012. The policy was used again the following day to remove anti-Semitic French tweets with the hashtag #unbonjuif ("a good Jew"). After the sharing of images showing the killing of American journalist James Foley in 2014, Twitter said that in certain cases it would delete pictures of people who had died after requests from family members and "authorized individuals". In 2015, following updated terms of service and privacy policy, Twitter users outside the United States were legally served by the Ireland-based Twitter

International Company instead of Twitter, Inc. The change made these users subject to Irish and European Union data protection laws. On April 8, 2020, Twitter announced that users outside of the European Economic Area or United Kingdom (thus subject to GDPR) will no longer be allowed to opt out of sharing "mobile app advertising measurements" to Twitter third-party partners."

"The paper discussing this possibility mentions that the use of ICT in procurement has several benefits such as increasing transparency, facilitating digital access to public tenders, reducing direct interaction between procurement officials and companies at moments of high integrity risk, increasing outreach and competition, and easier detection of irregularities. Besides using e-tenders for regular public works (construction of buildings, roads), e-tenders can also be used for reforestation projects and other carbon sink restoration projects. Carbon sink restoration projects may be part of the nationally determined contributions plans in order to reach the national Paris agreement goals. Government procurement audit software can also be used. Audits are performed in some countries after subsidies have been received. Some government agencies provide track and trace systems for services they offer."

"The Shadow Brokers, who leaked the exploits which were subsequently used in WannaCry but are unlikely to have been involved in the attack, began accepting Monero as payment later

in 2017. In 2021, CNBC, the Financial Times, and Newsweek reported that demand for Monero was increasing following the recovery of a bitcoin ransom paid in the Colonial Pipeline cyber attack. The May 2021 hack forced the pipeline to pay a \$4.4M ransom in bitcoin, though a large portion was recovered by the United States federal government the following month. The group behind the attack, DarkSide, normally requests payment in either bitcoin or Monero, but charge a 10–20% premium for payments made in bitcoin due to its increased traceability risk. Ransomware group REvil removed the option of paying ransom in bitcoin in 2021, demanding only Monero. Ransomware negotiators, groups that help victims pay ransoms, have contacted Monero developers to understand the technology."

"BlackRock invests the funds of its clients (for example, the owners of iShares exchange-traded fund units) in numerous publicly traded companies, some of which compete with each other. Because of the size of BlackRock's funds, the company is among the top shareholders of many companies. BlackRock states these shares are ultimately owned by the company's clients, not by BlackRock itself—a view shared by multiple independent academics—but acknowledges it can exercise shareholder votes on behalf of these clients, in many cases without client input. In the 2020s, the company took steps to allow institutional investors to participate in shareholder voting in nearly half of BlackRock's equity index assets. BlackRock has been the subject of conspiracy theories, including the conspiracy theory that BlackRock owns both Fox News and Dominion Voting Systems. Although it is true that BlackRock owns 15% of Fox Corporation, Snopes described the whole claim as "false" and PolitiFact described as "mostly false" because of the absence of participation of BlackRock into Dominion Voting Systems."
